Full-stack software engineer building software for Germany's critical energy infrastructure at Amprion. I own features end to end, from design through to production. First Class Honours graduate in Software Development, working in English and German.

EXPERIENCE

Full-Stack Software Developer · Amprion GmbH — Jan 2025 – present

- Building and maintaining full-stack software for one of Germany's four electricity transmission system operators, owning features from requirements through to production.
- Gathering requirements directly with stakeholders and turning them into technical solutions.
- Reviewing colleagues' code and handling deployments.
- Contributed to ÜFIP, the real-time coordination platform for Germany's electricity and gas transmission operators (launched November 2025).

Java · Jakarta EE · React · PrimeReact · PrimeFaces · Hibernate · Oracle DB · Liquibase

Full-Stack Developer · Loomina — 2024 – Jan 2025

- Built a full-stack generative AI learning platform in TypeScript, with Vue.js on the frontend and Koa.js on the backend.
- Designed and integrated REST APIs for live chat and AI content generation, using OpenAI GPT-4o and Prodia image generation.
- Implemented OAuth 2.0 Google sign-in with Supabase, including real-time data management.
- Configured Koa middleware for CORS, rate limiting and authentication.

TypeScript · Koa.js · Node.js · Supabase · Vue.js

Software Engineer Intern · Logitech, R&D — Jan 2022 – Sept 2022

- Worked with the R&D team to conceptualise, research, build and test prototypes for new product ideas.
- Built front-end features for web applications in React and TypeScript, including 3D experiences with Three.js.
- Built test environments in Unity using C#.
- Took part in qualitative analysis of user test results to guide project direction.

React · TypeScript · Three.js · Unity · C#

EDUCATION

BSc (Hons) Software Development, First Class Honours · Munster Technological University — 2019 – 2023

- Thesis: automated decryption of substitution ciphers using hill climbing; nominated for Best Final Year Project.

Level 5 Certificate, Software Development · Cork College of Commerce — 2018 – 2019

SKILLS

Languages	Java, TypeScript, JavaScript, Python, SQL, C#
Backend	Jakarta EE, Node.js, Koa.js, Hibernate, Liquibase
Frontend	React, PrimeReact, PrimeFaces, Vue.js, Three.js
Data & tools	Oracle DB, Supabase, Git, Unity
Spoken	English (native), German (professional)

AWARDS

Best Final Year Project, nominee · MTU — 2023

Best Business Plan, winner · Enabling Entrepreneurship — 2019

VOLUNTEERING

Volunteer · THW (Federal Agency for Technical Relief)
June 2024 – Sept 2026
